Builder	Inscope Solutions Pty Ltd
Status	Completed 2007

About

Sydney Wildlife World was a new tourist attraction that was being created adjacent to Sydney Aquarium and Darling Harbour to feature over 6,000 native Australian animals.

The works were tendered when essentially only concept sketches had been prepared and Inscope Solutions were engaged for this project on a D&C basis. They were responsible design and construction of all internal exhibits as well as retail & restaurant areas.

The project involved considerable innovative design & engineering solutions, especially for the exhibits and it was delivered on time & budget
